

GRIPRING™ PIPE RESTRAINER

FOR USE ON DUCTILE IRON, C-900, & IPS SIZE PVC¹

RESTRAINT SYSTEMS

A ROMAC ORIGINAL GripRing™

U.S. PAT. NO. 5335946

The GripRing's articulating wedge action provides the restraint required for virtually any pressure.

- Full circumferential pipe restraint.**
 This spreads the restraining forces more evenly than restrainers using radial bolts or pads.
- Built-in stop to prevent damage to pipe.**
 The "gap" in each GripRing is designed to completely close before a pipe can be excessively stressed.
- The GripRing flexes to accommodate deflection allowed in a Mechanical Joint.**
 Restrains under the misalignment conditions often found in the field.
- Easy to install.**
 The GripRing™ uses standard mechanical joint gasket and T-bolts. There are no radial bolts or pads for the installer to forget to tighten. When the T-bolts on the gland are tightened, the GripRing restraint system is engaged.
- The gland is painted yellow to avoid confusion.**
 Since the gland used with the GripRing restraint system is similar in looks to a standard MJ gland, it is painted yellow. The inspector can easily see that a restrainer has in fact, been used.
- Rated to full working pressure of pipe.**
 GripRing pipe restrainers may be used at the full rated capacity of the pipe, including an allowance for pressure surges.

NSF61/372 compliant upon request.
